## Natural medicine – with steam from Bosch

### Background

- ▶ New pharmaceutical production for herbal medicine
- ▶ High requirements for safety, sterility and precision

### System

- ▶ Modular boiler U-MB with 600 kg/h of steam and modulating natural gas burner
- ▶ Heat recovery from flue gas and desalting water
- ▶ Further system components like feed water deaeration and controls for a reliable operation of the system

### Benefits

- ▶ Compact design for limited installation altitude
- ▶ Ready-to-connect unit for quick installation
- ▶ Consistent high steam quality even at high load fluctuations
- ▶ Prevention of maloperation and support of the operator staff
